

# Preseem

Understand and improve the subscriber quality of experience, and increase operational efficiency across vendors and access technologies.

Preseem is a **hybrid cloud-based architecture platform** that helps fixed wireless and fiber operators understand and proactively improve subscriber quality of experience (QoE).

Hundreds of regional ISPs use Preseem to monitor their network health across all subscribers, access technologies, and vendors. A four-time WISPA Service of the Year award winner, Preseem has data-powered tools that **reduce costs, boost efficiency, and benefit every team** in your organization.

## Benefits For You:

Get a **single view of your multi-access, multi-vendor network** and all of your subscribers in one data-rich platform.

**Simplify your operations and reduce integration complexity** with Preseem's single point of plan enforcement. Truly understand the subscriber experience and quickly identify whether issues are network-wide or in the customer's home

Preseem helps **reduce the volume of calls and tickets received by your support team**. Get the tools your support technicians need to find the root cause of issues faster, access relevant information quickly, and increase expertise and efficiency.

Get the most out of your network investment dollars and optimize your sales and marketing spend, while increasing the flexibility to add new vendors and **lowering the total cost of ownership**.

Manage your network **proactively** with Preseem's exclusive and easy-to-understand metrics. Stop staring and comparing on multiple vendor tools, and start fixing problems instead of searching for them.

Get a better understanding of what's happening on your network while improving ROI and subscriber QoE, and reducing latency, support calls, and operational costs.

**Everything you need in one place.**
